AMX MEDICAL SYSTEMS

AN ISO 9001 : 2008 CERTIFIED CO.

An innovative high image quality with rise to the Next Evolution in X-RAY

About us

We are an eminent name in the field of Medical Equipments, offering highly reliable X-ray Machines in various Models (line frequency X-ray machines upto 500mA), High Frequency X-ray machines from 3.5 kW to 80 kW capacity, control panel for radiological machines and C-Arm image intensifier systems. These find application in reputed hospitals and surgical clinics owing to their features of ease of operation, good maneuverability and durability.

Digitone 50 **50 mA Real portable X-Ray machine**

Ratings - 50 mA at 52 KVP, 20mA at 68 KVP, 15 mA at 85 KVP, Weight -17 kgs.

Digitone 100 P 100 mA Portable X-Ray Machine

Rating - 60mA at 30 to 100 KVP, 40mA at 30 to 100 KVP,
20mA at 30 to 100 KVP.

Micro controller based timer - 0.02 to 10 Sec. in 24 steps.

Power Requirement - 8 KVA, 220 Volts, Single Phase, AC supply

Digitone D Dental x-ray machine

10 mA, 70 kVp, 0.01 to 5 seconds micro-processor based timer with R.V.G comparative timer with remote control.

Standard Panoramic
Clear, sharp images with a wide image layer. The thick, specifically designed image layer accommodates all possible variations of dental arch shapes and sizes to produce extremely clear and sharp images.

Pedodontic Panoramic at Reduced Radiation
For examinations of children or people with small jaws, the rotation range of the arm is diminished, thereby further reducing radiation exposure.
